DRY CLEANING IS SO **YESTERDAY**

CLEANER CLOTHES + CLEANER CONSCIENCE

EcoClean uses a water-based process known as wet cleaning to clean a wide range of fabrics including dry-clean only garments. Wet cleaning uses water, specialized biodegradable detergents and state-of-the-art equipment to leave garments soft to the touch with no chemical odor or residue. Wet cleaning gets clothes cleaner, and it's safer for both humans and the environment than traditional dry cleaning.

PERC FREE

The dry-cleaning chemical perc is a petroleum solvent that is bad for your clothing, your health, and the environment. So we don't use it! Perc can enter the body through inhaling fumes, touching the skin or contaminated drinking water. Prolonged exposure has been linked to neurological effects, liver and kidney damage, and cancer. Perc has been found in more than 25% of United States' drinking water sources and elevated levels of perc are found in homes as cleaned garments continue to off-gas.

Coupon good for first time delivery with a \$25 minimum order or 25% off of your first in-store visit.
